Tinder for Investing

Know yourself. Match your money.

AI-powered stock and ETF discovery, built around the person investing.

A profile. A clear report. An informed choice.

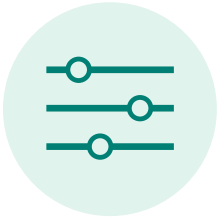

More ideas. Less personal fit.

Investment discovery starts with the ticker.

Noise

Too many tickers.
Too much content.

Generic filters

Security metrics.
Little personal context.

Mismatch

Risk discomfort.
Low conviction to hold.

The opportunity: investments people can live with.

A report before a recommendation.

Self-knowledge becomes an explainable investment filter.

01 KNOW YOURSELF

Answer

15 core questions
35 fully optional

02 UNDERSTAND

Investor DNA

Risk, horizon
and decision style

03 CHOOSE

Stocks + ETFs

Daily ideas.
The user decides.

Why it fits. Why it might not. Your choice.

Start with 15 simple questions.

Broad, low-friction questions. No finance jargon.

SAMPLE QUESTION 03 / 15

How long can you leave money invested?

- ○ Under 1 year
- ○ 1–5 years
- ◉ **5+ years**

~2-minute design target

PRIORITIES

Steady growth or upside potential?

RISK COMFORT

How would you react to a 10% drop in one month?

DECISION STYLE

Frequent decisions or set a plan?

35 optional questions. Deeper context.

Explore behavior under stress without forcing a longer onboarding.

Fully optional | Skip anytime

SOCIAL INFLUENCE

Friends profit from a hot theme. Do you feel pressure to join?

LOSS AVERSION

Would you rather miss upside or risk a large drawdown?

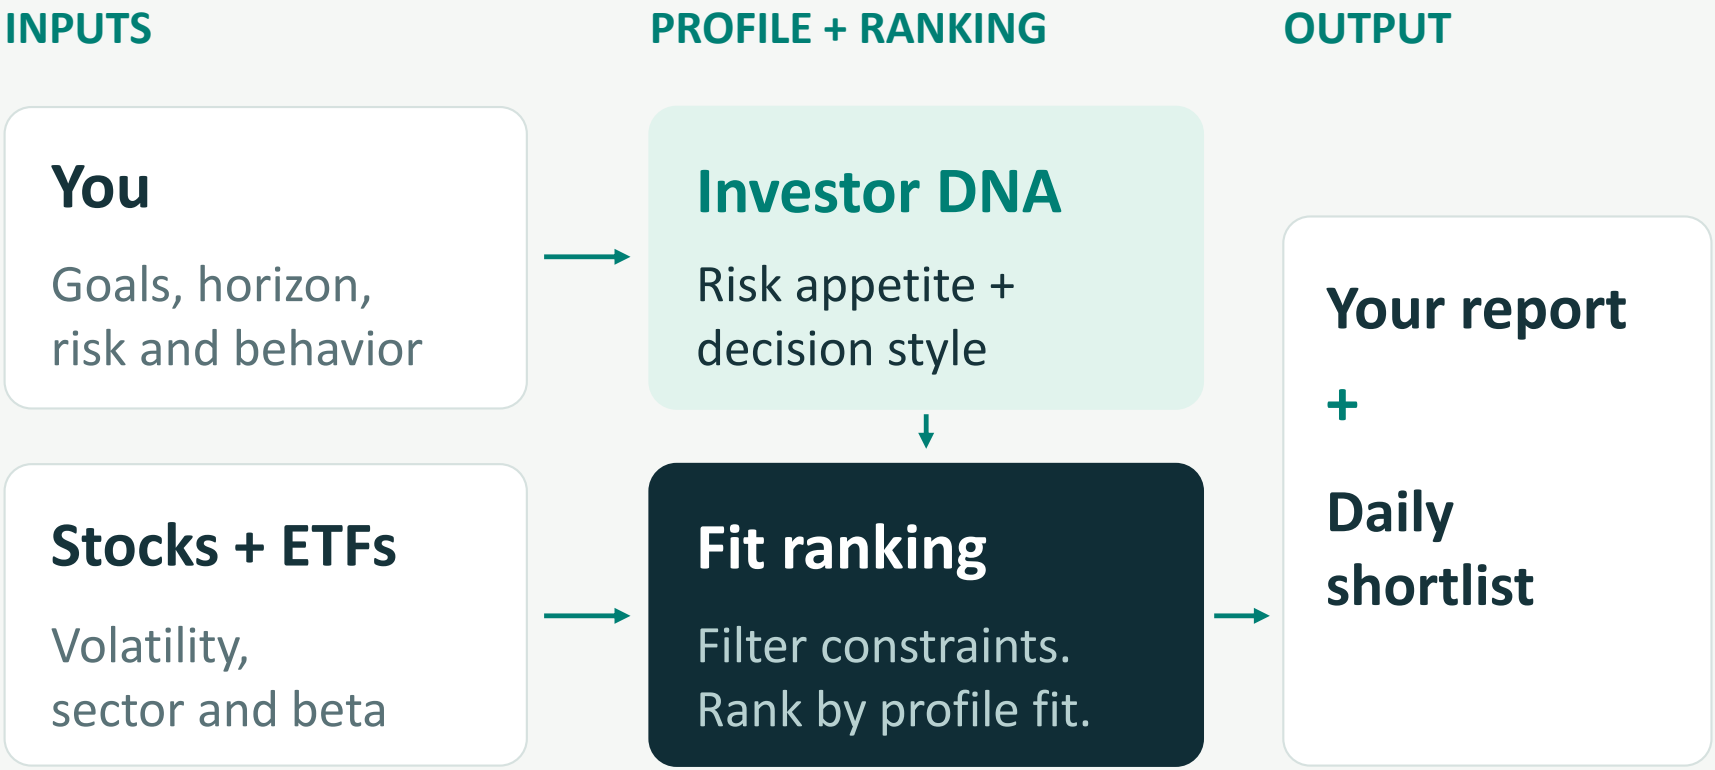

DISCIPLINE

How often do headlines change your investment decisions?

Human context meets investment data.

Translate answers into a profile, then explain each match.

Every match: reasons + watch-outs.

A report first. A match second.

Show the profile, explain the fit, make the trade-offs visible.

YOUR INVESTOR DNA

Risk	**Moderate**
Horizon	**5+ years**
Style	**Rules-based**

WATCH-OUT

Sharp drawdowns may test your comfort.

POTENTIAL CORE

Broad-market ETF

Review: volatility + concentration

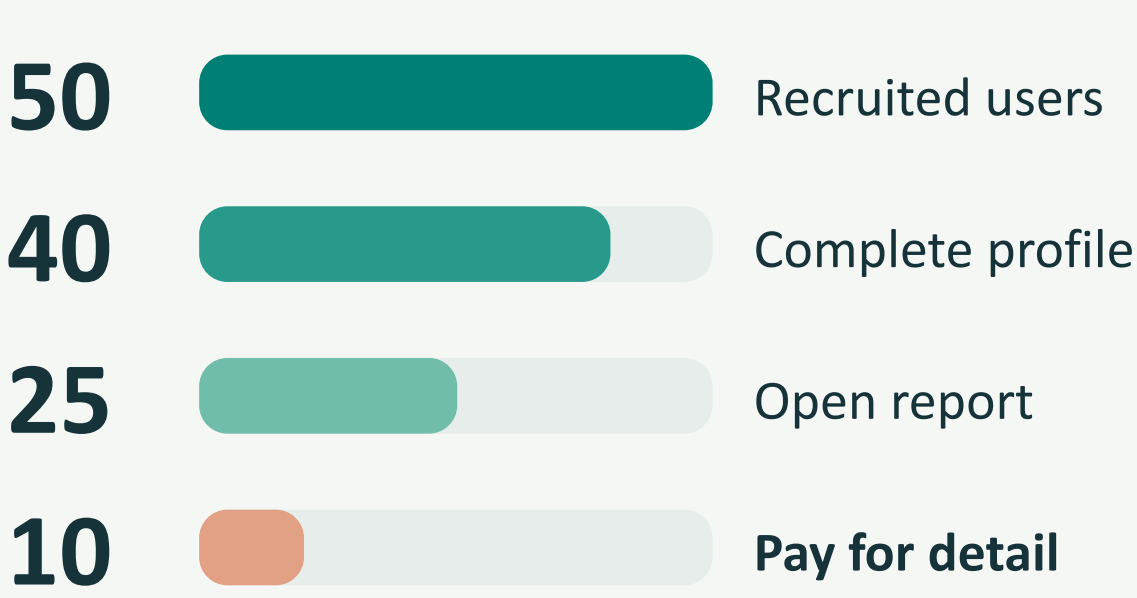

INCOME-FOCUSED OPTION

Dividend ETF

Fit depends on your income needs.

Test willingness to pay with 50 users.

30-day beta. Directional learning before wider distribution.

FIRST CHANNELS

- **University + alumni**
- **Investing clubs + referrals**
- **Sample-report content**

80% profile completion target **20% paid conversion target**

PLANNED BETA / TARGETS, NOT TRACTION

A small budget to test paid demand.

Validate a one-time report before exploring subscriptions.

DETAILED REPORT
